

WIDESPREAD BUT SLOWER GROWTH IN 2013

Advance Statistics of GDP by State

Percent Change in Real GDP by State, 2013

- Real GDP increased in 49 states in 2013. Leading industry contributors were nondurable-goods manufacturing; real estate and rental and leasing; and agriculture, forestry, fishing, and hunting.
- Nondurable-goods manufacturing was the largest contributor to U.S. real GDP by state growth in 2013. This industry was the leading contributor to real GDP growth in 10 states, contributing 2.65 percentage points to growth in Louisiana and 1.19 percentage points to growth in Texas.
- Real estate was the leading contributor to growth in the New England region and contributed 0.50 percentage point or more to growth in North Dakota, Nevada, and Massachusetts.
- Agriculture, forestry, fishing, and hunting contributed to real GDP growth in 49 states and the District of Columbia.
- In North Dakota, the fastest growing state in 2013, mining contributed 3.61 percentage points to the state's 9.7 percent growth in real GDP.
- In contrast, government subtracted from real GDP growth in six of eight BEA regions, 39 states, and the District of Columbia in 2013.
- Alaska was the only state where real GDP decreased in 2013, primarily due to a decline in mining.
- Per capita real GDP ranged from a high of \$70,113 in Alaska to a low of \$32,421 in Mississippi. Per capita real GDP for the U.S. was \$49,115.

BEA data—including GDP, personal income, the balance of payments, foreign direct investment, the input-output accounts, and economic data for states, local areas, and industries—are available on the BEA Web site: www.bea.gov. [E-mail](#) alerts are also available.

NOTE: The next release of GDP by state is scheduled for the summer of 2015.
